DETAILED ACTION

This application has been examined.

Claims 1-11 are presented for examination.

Drawings

The Examiner contends that the drawings submitted on November 8, 2001 are acceptable for the examination proceedings.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Application/Control Number: 10/007,155 Page 3

Art Unit: 2173

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,639,612. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scopes of the claims are similar. Both, the present application and U.S. Patent No. 6,639,612 recite check box, which can be toggled by a mouse, a pen stylus, or a touch, with using a drag event on check boxes.

Allowable Subject Matter

Claims 1-11 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance.

The present invention is directed to a method for ad hoc check box selection in graphical user interfaces employed via the user of drag-and-drop operation.

Claims 1, 8, 10, & 11 recite a method/system/computer program product for toggling check box status to comprise the unique steps of: detecting a touch event on first check box, toggling the status of the first check box and repeatedly carrying out the steps of detecting a drag event for each additional check box onto which the user drags the pointer, wherein the status of each said additional touch box is toggled in response to the detection of said drag event.

Application/Control Number: 10/007,155

Page 4

Art Unit: 2173

The prior art of record describes selecting/deselecting/aggregating check boxes individually or in group, for example Cox, Jr. et al (US 6,104,398). However, none of the prior at singularly or in combination, anticipates or renders the above-cited limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to O'Neal R Mistry whose telephone number is (703) 305-2738. The examiner can normally be reached on 9am - 6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W Cabeca can be reached on (703)308-3116. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
